

anitwitter.moe

Anitwitter.moe is a meme focused on providing a community free of overbearing moderation, censorship, and other bullshit that the big social media platforms do. Still being tested, expect the site to go down on occasion.

If you have not received a confirmation email yet, check your spam folder, then join our discord server and ask in the #anitwitter_dot_moe channel for help with manual account confirmation. The big email providers have blocked us from sending out so many confirmation emails, and they are almost done reversing the blacklist.

Bored of this interface? Try out t.anitwitter.moe, it lets you use multiple accounts and has a more tweetdeck-like style. We are working on deploying a twitter webapp clone as well, stay tuned.
