This is a moderated server focused on the discussion of RPGs. We talk about RPGs in general and occasionally about the OSR subculture in particular, as well as game design, board games, and all of the other varied topics you can find on other Mastodon instances.

Any moderation of content on this server is intended to foster better discourse. Disagreement and discord are fine, but being an asshole who drives out other voices is not.

And, to be clear, we're going to lean towards being SJW Cucks in this.
